- Agile methodology/Scrum

SOFT SKILLS

As a self-taught Developer, I highly value teamwork, responsibility, and effective time management. I thrive on collaborating with others to achieve common goals and take full ownership of my projects.

PROJECTS AND EXPERIENCE

Restaurant Management Software

This project aims to improve the efficiency, administration, and security of an establishment through customized software. It allows for user management, sales and purchase tracking, ticket generation, and inventory management. The goal is to optimize operational effectiveness and organization within the establishment effectively.

Custom webSites

Developer skilled in creating visually appealing and functional websites. Check out my portfolio at portfolioluisdm.netlify.app to see my innovative solutions. With a passion for continuous growth and meticulous coding, I consistently deliver captivating user experiences that blend form and function seamlessly.

IJRobotic: Smart Plant

Actively participated in an AWS EC2 and ELK stack project for data analytics and monitoring. Leveraged Elasticsearch for efficient data storage and retrieval, Logstash for data formatting, and Kibana for real-time visualization of machine performance metrics. Implemented ElastAlert for timely alerts and notifications across multiple channels. Demonstrated expertise in AWS EC2, ELK stack, and data-driven decision-making.
